

Michael "Andy" Brown, as Vice President of Glen/Mar Construction, Inc., is responsible for sales and business development, and shares responsibility for strategic planning, key organizational relationship management, and government affairs. Andy has over 15 years' experience in the commercial and industrial at-risk construction market and government contracting. As a Woman-Owned and Service Disabled Veteran Owned Small Business, Glen/Mar performs vertical building construction, seismic renovations, and horizontal construction for federal, state and local agencies including the Department of Veterans Affairs, Army Corp of Engineers, and the GSA throughout the West Coast and Hawaii.

Andy joined Glen/Mar in 1999 as a laborer, gaining invaluable experience and knowledge of the trades and field operations of construction projects. His experience in the field triggered a desire to grow within the company, resulting in a career path that included site Superintendent, Project Manager and Estimator, and then as Director of Operations before becoming Vice President. After the sudden and unexpected passing away of his father, Glen Brown in 2010, Andy continued as acting Director of Operations while assuming the business development and federal contract administration duties as Vice President. Under Andy's leadership Glen/Mar has expanded both geographically and in magnitude, expanding operations to multiple field offices in Oregon, Washington, California and Hawaii.

Andy served on the Board of Directors of the AGC Oregon Columbia Chapter from 2013 to 2014. Andy currently serves as the Co-Chair of the Small Business Committee of the Federal and Heavy Division of AGC of America. In June 2015, Andy participated on a taskforce that spoke on behalf of the AGC in a meeting with VA Secretary McDonald in D.C. to address ways to improve the Department of Veterans Affairs construction program.

Andy currently serves on the Advisory Board of Directors for USO NW. Andy, on behalf of Glen/Mar, donated his time as project executive, providing both value engineering and professional contacts for the construction of the USO NW Center at Portland International Airport for active duty military and their families that opened in 2014. As part of his continued philanthropy, Andy contributes to the efforts of the Returning Veterans Project and Blue Star Mothers of Oregon. Andy has been a member of Vistage Portland, a chief executive leadership organization, since 2010.

Andy has a Bachelor of Science in Political Science and Government from the University of Oregon. In his personal life, Andy enjoys spending time with his family, traveling, fishing and coaching his kids in youth sports. Andy lives in Happy Valley, OR, with his wife, Cara, and his two children, Garrett and Kelsey.
