#### PRESENTATION OBJECTIVES:

- Review cyber incidents within the community and elsewhere. Where are the threats coming from?
- Discuss what cyber criminals are trying to accomplish and gain from their crimes and the most common cyber-attack methods and tactics used by cyber criminals today.
- Review the details and importance of Technology Use Policies and Incident Response Plans and how Assessments and Testing can work to protect an organization. Learn about the tools available to protect your company, employees and patients and how to build a culture of cybersecurity defenders in your organization.
- To educate the audience about the existing data regarding anti-VEGF therapy and its effect on non-perfusion in ischemic diabetic retinopathy.
- To discuss the paradigm shift from panretinal photocoagulation to anti-VEGF therapy for diabetic retinopathy.
- To critically review results of a randomized clinical trial evaluating YAG vitreolysis for symptomatic floaters.

#### FACULTY DISCLOSURE POLICY:

All faculty members participating in this educational program are expected to disclose to the program audience any significant financial interest and/or other relationship with the manufacturers and providers of commercial products and/or services discussed in their presentation and their relationship or financial interest in any commercial contributor to the educational activity.
